

# FUELING FUTURE CHAMPIONS

**The CRF125F is designed to hit that sweet spot of no-hassle fun for younger riders.**

Whether they're starting out, building confidence, or just looking for fun, the CRF125F is built to keep up. The twin-spar steel frame can handle the dings of off-road use while fuel injection gives broad and reliable power. The long-travel suspension delivers a plush ride, and the electric starter and four-speed transmission give you all the control of a full-sized bike.

The Big Wheel option provides additional ground clearance, longer-travel suspension, and a larger front wheel. It includes all the great features of the CRF125F, along with a longer swingarm that raises the seat height by two inches. Pick the CRF that's right for you and get ready for new adventures!
