XL750 TRANSALP E-Clutch

Ross White
Mat Ballistic Black Metalic

Engine	
Engine Type	Liquid-cooled, 4-Stroke
Displacement (cc)	755
Cylinders	Inline 2
Valves	8
Compression Ratio	11:1
Bore & Stroke (mm)	87 x 63.5
Starter	Electric
Fuel System	Fuel Injection
Transmission	6-Speed
Drive	Chain
Fuel Capacity (L)	16.9
Dimensions	
Overall Length (mm)	2,325
Overall Width (mm)	838
Overall Height (mm)	1,455
Wheelbase (mm)	1,560
Seat Height (mm)	850
Ground Clearance (mm)	195
Kerb Weight (kg)	216
Tyres (Front)	90/90-21
Tyres (Rear)	150/70-18
Chassis	
Front Suspension Type	43mm Inverted Telescopic Fork
Front Wheel Travel (mm)	200
Front Adjustability	Preload, compression & rebound
Rear Suspension Type	Pro-Link, single-shock
Rear Wheel Travel (mm)	190
Rear Adjustability	Preload, compression & rebound
Brakes (Front)	2x 310mm discs, ABS
Brakes (Rear)	1x 256mm disc, ABS
Warranty	
6 year unlimited KM (3 year STD + 3 year bonus)+	

High Performance

The 755cc parallel twin-cylinder engine is designed to produce a hard hit of top end power, with maximum output of 67.5kW of power and 75Nm of torque. This is accompanied by significant usable torque in the low-to-mid RPM range. The result is an engine that offers engaging performance for all types of rides and distances.

Adjustable comfort for changing terrain

New to the 2026 model, the fully adjustable SHOWA® suspension lets you tailor your riding experience to suit the adventure. Upgraded front and rear, it absorbs changing terrain with ease for all-day comfort and confidence.

Enhanced Wind Protection and Comfort

When you're on the road all day, minimising fatigue is key. Thanks to its new central intake duct, the Transalp channels high-speed airflow around the head area, ensuring a more relaxed and comfortable highway cruise. The aerodynamic fairing and screen boost stability and reduce wind noise at speed.

Clutch-free or classic. Choose your ride

Enjoy the freedom to switch between E-Clutch (available on E-Clutch variant) and full manual control whenever you choose. Integrated with an advanced Throttle By Wire (TBW) system, it delivers precise engine response and smooth performance. E-Clutch variants also come with a factory-fitted skid plate that improves handling feel, cornering performance and stability at speed.

Lightweight Steel Diamond Frame

Weighing just 18.3kg, the steel diamond-style frame is lightweight yet robust, featuring a strong rear subframe to handle long-range touring loads. The aluminium swingarm, coupled with Pro-Link®, ensures smooth and precise control.

Six Selectable Riding Modes

The six default riding modes—Gravel, Sport, Standard, Rain and two User modes—are designed to adapt to various conditions, adjusting power and engine braking for optimal performance. User mode allows your custom preference of each parameter including rear ABS switch off for off road riding. Throttle by Wire provides more precise throttle control for a smoother ride.

Overseas model shown. Honda Australia Motorcycle and Power Equipment Pty. Ltd. Level 4 6 Gladstone Street, Moonee Ponds, Victoria 3039. ABN 96 006 662 862.
