READY, SET, WIN!

A new level of control, agility, and racing pedigree.

For the 2025 edition of the CRF250R, we've pushed the boundaries even further with a redesigned frame for sharper turns, new suspension components for consistent stroke performance, and a more responsive front brake with less lever play. With HRC Launch Control for optimal starts and three riding modes for mixed conditions, you can tackle any track with confidence. For the first time ever, Honda is launching a Works Edition in the 250cc category. Nothing short of racing excellence, the Works Edition includes all the base CRF250R features, revved up by a professional suite of exclusive factory touches.

Showa® Fork

The 49mm Showa® fork features a conventional spring design that helps increase front suspension precision, handling and feel. New springs, seals and valving improve the consistency of the stroke feel throughout the entire range of travel, delivering a smoother and more controlled ride.

HRC Launch Control

Harness the power of HRC Launch Control for flawless starts. With three riding modes for mixed conditions, you can select the optimal power delivery for any track condition. Activate it with the press of a button and catapult yourself to the podium!

New Triple Clamps

New top and bottom triple clamps work with the new frame, revised fork, new front axle and new steering stem for a more consistent suspension feel throughout the stroke. Together, the new hardware helps improve the responsiveness, rigidity and turning performance of the new line. The road to perfect balance starts here.

New Frame

Superior handling starts with an exceptional frame, and the CRF250R delivers. The new chassis features optimised rigidity and reduces weight, while enhancing responsiveness and stability. Feel the difference in comfort and performance as you take on the track in front of you.

CRF250RWE FEATURES

Yoshimura Exhaust

Featuring a stainless steel header pipe and titanium muffler, the Yoshimura exhaust system boosts the torque and power of your ride. It's light, super trick, and tucks away neatly for better ergonomics.

New Hydraulic Clutch

The CRF250RWE features a new, hydraulically actuated clutch just like the CRF450s do. The Grand Prix MX-inspired system reduces clutch free play variation, allowing for smoother gear shifts when you need them most.

Dunlop Geomax Tyres

Offering superior grip, slide control, bump absorption and durability, Dunlop MX33 tyres provide the stability and traction needed to harness the power of the Works Edition.
